The Nakoma Group Completes Acquisition of The Implementation Partners (TIP) Expands Capabilities to ERP Consulting

The Nakoma Group, an established provider of outsourced application development, IT simplification technologies and staff augmentation services for Medium and Large Enterprises, today announced the successful completion of its acquisition of The Implementation Partners (TIP).

TIP is an ERP software consultancy specializing in PeopleSoft and JD Edwards Software. TIP has created a fully functional Technology Center, primarily for PeopleSoft and JD Edwards applications, in Denver, Colorado. The Technology Center serves as both a research and development facility that enables TIP specialists to master current technologies and research new functionality and tools as they are released, and as an offsite laboratory in which customers perform upgrades very efficiently.

"TIP is well known for their deep technical expertise in PeopleSoft and JD Edwards and for always providing their customers with tremendous value." said Ron English, CEO of the Nakoma Group. "TIP rounds out our capability to help IT executives get the most from their IT resources whether it's by optimizing their data centers or more efficiently upgrading their ERP system in our lab. TIP is a great fit."

The Nakoma Group acquired the assets and liabilities of TIP in an all cash transaction. TIP will operate as a separate business unit within the Nakoma Group family of companies and will retain the name The Implementation Partners, TIP.

"The Nakoma Group provides a complimentary set of services for our loyal customer base, said Scott Tracy, Managing Director TIP. Nakoma also gives us greater reach for our ERP consulting services."

About Nakoma Group™ – Since 1979, The Nakoma Group has been helping medium and large IT organizations realize the full potential of their physical and human assets by providing supplemental technical expertise and outsourcing Application Development & Integration projects. Recently, through its technology R&D arm, Simplex_{NG}, the Company has developed unique software tools that enable its consultants to more efficiently migrate "new legacy" applications to a .NET environment, and to identify opportunities for reducing infrastructure costs through various simplification strategies.

Headquartered in Huntington Beach, CA, The Nakoma Group and its subsidiaries, Simplex_{NG} & TIP also have offices in Charlotte, Denver, Phoenix & San Francisco.
